

Mississippi Driver's License and ID Card Information

Mississippi joined the Records and Information from DMVs for E-Verify (RIDE) program in June 2011 for driver's licenses and January 2013 for ID cards. When an employee presents a Mississippi driver's license or ID card as his or her List B document for Form I-9, E-Verify will prompt you to enter the document information and will verify it against Mississippi records.

- Select "Driver's license" as the document name in E-Verify for any Mississippi document called a **Driver License, Non-US Citizen Driver License, Intermediate License, Commercial License** or **Learner's Permit**.
- Select "ID card" as the document name in E-Verify for any Mississippi document called an **Identification Card**, which also will state "NOT a DRIVER LICENSE."
- Mississippi driver's licenses have the state name, shape and type of driver's license in green or red, while ID cards show this information in blue.
- Mississippi issues horizontal driver's licenses and ID cards for individuals age 21 and over and issues vertical driver's licenses and ID cards for individuals under age 21.
- The **Non-US Citizen Driver License** is a valid List B document for Form I-9.
- Mississippi driver's licenses and ID cards contain document numbers (circled below) that are nine numeric characters. All Mississippi driver's licenses and ID cards include expiration dates.
